Building AI products that work technically, feel human and grow businesses - lived all three sides of the build.

- Shipped AI products from 0→1 at GoDaddy and SAP Labs across B2B and B2C
- Unlocked \$28M revenue opportunity; drove 70% support ticket reduction
- Built AI Agents to consolidate product knowledge, reducing user effort by 40%

Professional Experience

GoDaddy

June 2025 - Dec 2025

AI Product Manager Intern

- Built **AI Agents** to consolidate SSL & PKI knowledge, reducing user effort by 40%, improving resolution at scale.
- Secured a **\$28M revenue** opportunity by leading Digital Mark Certificates (CMC/VMC) from 0→1, authored the **business case**, drove executive buy-in, and designed end-to-end workflows for a launch-ready product.
- Led the **0→1 launch** and **growth** of a Certificate Lifecycle Management platform, with a 20-person XFN team; ran **A/B tests** to optimize UX, driving **70% support ticket reduction**.
- Built and optimized **ACME flows** across AWS, Azure, and GCP, using A/B-tested user journeys to achieve **98% auto-renewal** success and OV/EV certificate flows to reduce churn for **4K+** monthly users.
- **Designed conversational AI flows** for **GoDaddy Airo** using Lovable.ai and Figma, iterating with XFN partners to scale experiences to millions of users.
- Conducted **market research** and **competitive analysis** for an email marketing partnership, unlocking a new revenue stream targeting 4.5M+ potential customers.

SAP Labs

Jan 2020 – Aug 2024

Product Manager

- Streamlined internal workflows for a **learning and development platform** offering (B2B) through user-centric design, reducing manual effort by 30% and dropout rates by 50%.
- Created 200+ **wireframes** and **mockups** using **Figma** to design simple, intuitive user interfaces for enterprise platforms, driving feature adoption and cross-functional alignment.
- Conducted **stakeholder interviews** and **usability tests** to define user requirements and prioritize product features.
- Led multidisciplinary initiatives to improve product readiness and supportability, reducing technical backlog by 20%.
- **Developed a 2-year business roadmap** for an NGO as an **SAP CSR** initiative, which was adopted and successfully implemented, enhancing operational efficiency by 40% in 18 months.

Technical Product Engineer : Data Warehouse(SAP BTP)

- **Optimized SAP BW ETL pipelines** and data workflows using **ODP** (Operational Data Provisioning), improving data extraction efficiency and increasing overall system performance by 15%.
- Reduced report generation time by 30% through **optimization of InfoCube** and **ADSO data models**, enabling faster financial decision-making.
- Developed and enhanced **ABAP-based data transformations** and CDS models, improving data modeling efficiency and enabling real-time analytics on **SAP HANA**.
- **Debugged** and resolved system performance bottlenecks across data pipelines, **improving latency**, ensuring high availability of analytical systems and **reducing support escalations**.

Projects

Office of Information Research Systems - University of Washington

Jan 2026 - Present

- Streamlining research award budgeting workflows by integrating centralized resources into a unified experience.
- Designing AI-assisted prototypes with smart autofill, validation saving users approx.4 hours per day.

TrailSense: AI-Powered Hiking Safety & Recommendation Platform

Jan 2026 - Mar 2026

- Owned end-to-end product strategy for an AI-powered hiking application and leveraged full-stack AI feature development using **Claude Code** and **RAG-based** workflows for personalized and context-aware trail recommendations.
- Defined AI architecture, **model evaluation**, and **responsible AI guardrails** using trail, weather, and geospatial data
- **Modeled AI cost** and monetization strategy, projecting **\$4K monthly revenue** through premium AI features.

Education

University of Washington – Foster School of Business

Sep 2024 – June 2026

Master of Science, HCDE-Product Management

Seattle, Washington

JSS Science and Technology University

Aug 2016 – Sept 2020

Bachelor of Engineering in Computer Science and Engineering

India
